WHAT'S MY RING SIZE?

Here are 3 easy ways to find out.

Make sure you print this PDF at 100% (do not scale to fit).

Tip: put your driver's license or credit card on the line below.

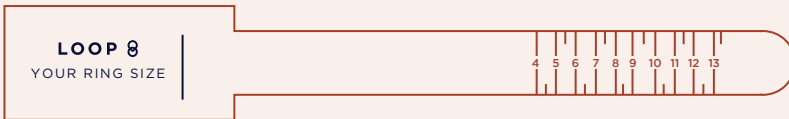

If it lines up, you're good to go.

1. DIY RING SIZER

- Print and cut out the DIY Ring Sizer (*to the left, to the left*).
- Create a slit by making a small cut on the line labeled YOUR RING SIZE.
- Slip the rounded end through the slit, creating a circle.
- Place around your finger and pull the rounded end to create a snug fit.
- The number line located at YOUR RING SIZE is...your ring size.

Tip: Check that it's not too tight (the ring needs to go over the knuckle)

2. THE STRING TEST

Wrap a string around your finger. Find the length of string that wraps around your finger exactly one time. Measure the length of the string against the closest measurement below.

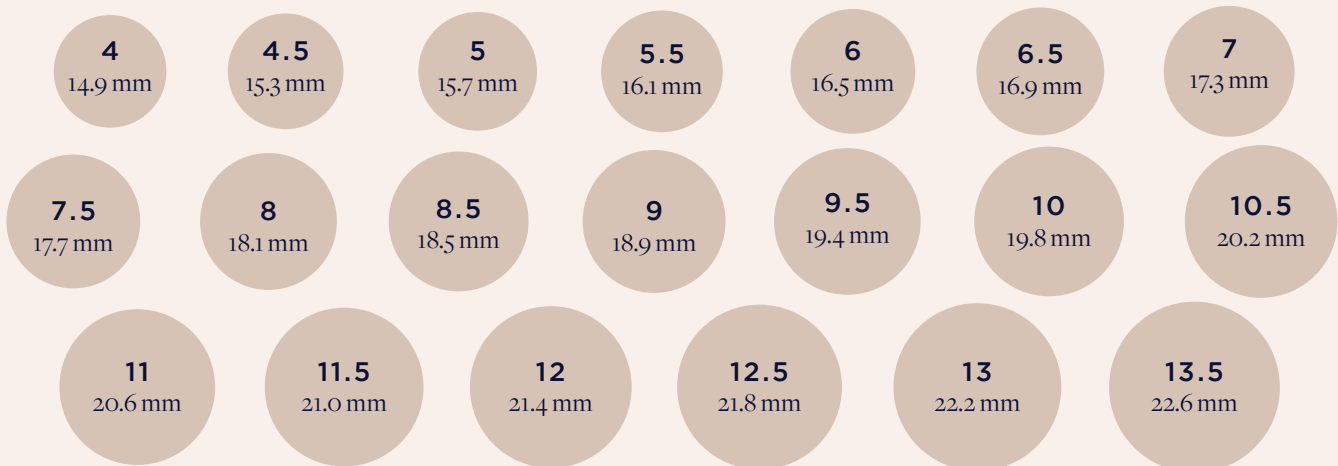

Tip: Double check for accuracy!

3. THE RING TEST

Find a ring that you—or bae wear regularly. (*For bae, preferably one she wears on the ring finger of her left hand.*)

Place the ring on top of this chart, and match the inside diameter of the ring to the circles below.

Just a note: these measurements are accurate but may not be 100% exact every time. If your Loop ring doesn't fit, we'll re-size it for free. Always.
